

From the Health Suite:

- ❖ It is best for medication to be given at home, but we understand that it is sometimes not possible. If a medication must be given during the school day, please follow these important procedures:
 - A written doctor's order is required for **ALL** medication. This includes all types of prescription treatments or over the counter medicines. Medication Order forms can be obtained from the District website or from the nurse.
 - A responsible adult must bring medications to school and they must be in their original container. Once medications are delivered to school, they are safely stored in the nurse's office and administered by the nurse as prescribed.
 - **Per District policy, students are not allowed to transport medicine to/from school.**
